LIMITED STRUCTURAL WARRANTY

Atlas Pools, Inc. warrants that the gunite or concrete swimming pool shell will remain structurally sound for as long as you own your pool. Structurally sound is defined as maintaining the structural integrity of the concrete swimming pool shell so as to withstand all normal loads or stresses as anticipated by our approved engineering plans. Upon written demand by Buyer, Atlas Pools, Inc. will perform necessary tests to determine if the concrete swimming pool shell is sound. If it is found not to be sound, Atlas Pools, Inc. will, at no cost to Buyer, perform repairs necessary to restore its structural integrity. If testing procedures show that the concrete swimming pool shell is sound, Buyer will pay costs of testing and repair. Atlas Pools, Inc. does not warrant against damage to the pool shell caused by failure to maintain proper water levels, underground water tables rising above the lowest point of the pool or damages caused by earth or fill ground movement, earthquake, acts of God, or acts of others. The term "concrete swimming pool shell" does not include trim coping (concrete or masonry applied to the structure for aesthetic purposes), tile, coloring, or decking.
